

Bartholomäus (Bart) Pieber studied chemistry at the University of Graz and the Graz University of Technology (Austria). In 2015, he completed his PhD in the group of C. Oliver Kappe (University of Graz). Following his doctoral work, he moved to Peter H. Seeberger's lab (Potsdam, Germany) for postdoctoral research. In 2018, Bart obtained a Liebig fellowship to start his independent research career as a group leader at the Max Planck Institute of Colloids and Interfaces. Since 2019, Bart is also a lecturer at the University of Potsdam. His research interests include synthetic methodologies, photocatalysis and flow chemistry.
