

Aurélien de la Torre was born and raised in Montpellier, France. There, he obtained his PhD in 2014, working on the total synthesis of isofuranoids under the supervision of Dr. Camille Oger and Dr. Jean-Marie Galano. After a first postdoctoral position in the group of Prof. Nuno Maulide (University of Vienna) and a second one in the group of Prof. Ilan Marek (Technion – Israel Institute of Technology), he was appointed as Chargé de Recherche CNRS at the Institut de Chimie Moléculaire et des Matériaux d'Orsay. He's research interests include total synthesis, asymmetric catalysis, cascade reactions and rearrangements.
