

Adrián Gómez Suárez graduated from the University of Santiago de Compostela in 2009. In 2014 he obtained his PhD from the University of St. Andrews for his studies on the chemistry of dinuclear gold complexes under the supervision of Prof. Steven P. Nolan. For his postdoc he moved to the WWU Münster to work with Prof. Frank Glorius on the development of screening technologies for reaction discovery. In 2018 he started his habilitation at the Bergische Universität Wuppertal, under the mentorship of Prof. Stefan F. Kirsch. His research interests include radical chemistry, catalysis, and photochemistry.
